Sizes to fit your needs

Compact, high-powered and rugged. More light, smaller footprint.

- Single-point light series
- Available in 316 stainless steel (shown) or black anodized aluminum
- Lights meet IP65 standards for environmental protection
- 31,680 lumen output - equivalent to 3-150 watt metal halide lights (144 LED model)
- Models available for extreme temperature environments
- Available in different color wavelengths for optimized performance
- Interchangeable focus optics allowing for flood to spot light configurations
- Camera power and sync signal via single cable connection
- Low profile design with external power supply
- Strobing LED for high-lumen output and long light life with no heat generation
- Available strobe frequency controller for stand-alone light systems
